I am

TO THE
GENTLEMEN OF THE STOCK-EXCHANGE.

GENTLEMEN,

THE second Loan for the present Year is at length fixed, and is Fourteen Millions and a Half for the Service of England and Ireland, and Sixteen Hundred and Twenty Thousand for the Emperor. The Terms are as follow, for each £100 Money subscribed.

British Loan.

Imperial Loan.

125	0	0	Consols.	£226	10	0	Imp. 3 per Cent.
50	0	0	Reduced.				
20	0	0	4 per Cents.				
0	6	0	per Ann. Long Annuity.				

As the Whole is contracted for by the same Parties, each Subscriber is entitled to a proportionate Share of the British and Imperial Parts, which together form one Loan of £16,120,000.

The Subscribers having made their Deposit at the Bank of 10 per Cent. on 18 Millions, on the Expectation of the Emperor having $3\frac{1}{2}$ Millions, has occasioned many Intricacies and Difficulties; for the Bank are obliged to divide the Loan of £16,120,000 among the Subscribers of 18 Millions, which will reduce each Subscription of £100 to $89\frac{11}{13}$, the Proportions of Stock for which are,

£100	13	$10\frac{2}{3}$	Consols.
40	5	$6\frac{2}{3}$	Reduced.
16	2	$2\frac{2}{3}$	4 per Cents.
20	7	$8\frac{2}{5}$	Imperial 3 per Cents.
0	4	10	per Annum. Long Annuity.

And they will have to return $£10\ 8\ 10\frac{2}{3}$ Money for every £100 Deposit they have received.

These Fractions must occasion so great an Increase of Trouble in the Hours of Business, that you cannot do without some Tables; and, as you have experienced my Correctness, I am confident you will not hesitate to place the fullest Reliance on

on my Accuracy in these Calculations: It shall therefore be my Care to preserve the Credit I have obtained, and merit the Continuance of your liberal Patronage.

An Explanation of these Tables, to you who are so well acquainted with the Business, is unnecessary; I shall only therefore add, I have provided Tables for the Produce of Omnium, (being the Amount to be received for each £895 11 1 $\frac{1}{3}$) and for each Thousand Pounds Worth, (usually called Omnium,) and also for the Fractions, being the Difference between the two. In the Scrip-Tables I have given every Receipt that will be issued from the Bank, and also some for larger Sums, over which, at the Top of each Column, I have put a small Figure, to shew of how many of each Produce of a Thousand it is composed; those marked have no smaller Fractions than I have set down, and therefore may be made Use of in casting larger Quantities; those marked $\frac{1}{2}$ cannot be made out by any Receipts, but are given to enable you to ascertain the Differences between any Number of even Thousands, and the Amount of the Receipts which are nearest in Value. I have made Use of Thirds of a Penny in several of the Articles, instead of Farthings, as being in general the nearest Denomination.

I have added a useful Table of Discount to be allowed on the Payment in full of Omnium, or of £1000 Consols, Reduced, 4 per Cents, and Imperial 3 per Cents, and of £ per Ann. Long Annuity.

If any farther Addition is necessary, I shall be happy to pay Attention to any Hints you may favour me with in the subsequent Numbers.

I am,

With the greatest Respect,

GENTLEMEN,

Your obedient Servant,

Stock-Exchange, May 15, 1797.

JOHN HEMMING
